

AIX

AI PRIVATE OPPORTUNITIES TRUST

A listed trust delivering access to private companies developing or enabling the global AI ecosystem.

4 September 2026

Dear investor,

We are pleased to provide an update on the continued build-out of the AIX portfolio. August highlights include:

1. Committed to a growth equity fund focused on leading technology companies, with a strong emphasis on AI investments across the ecosystem, including foundation models, applications, infrastructure, and physical AI.
2. AIX has established meaningful exposure to a developer of large-scale AI models.
3. The portfolio also includes exposure to companies operating across AI infrastructure, autonomous systems, defence technology, enterprise software and AI-enabled applications.
4. AIX is now almost 58.5% committed.

New Commitment

AIX has committed approximately 12% of the Trust to a growth equity fund focused on leading technology companies, with a strong emphasis on AI investments across the ecosystem, including foundation models, applications, infrastructure, and physical AI.

Foundation Model Exposure

AIX has established meaningful exposure to a developer of large-scale AI models. The company operates within the foundation model segment of the AI ecosystem, developing advanced AI systems for both enterprise and general-purpose applications.

The company represents the type of business identified in the AIX Product Disclosure Statement as an attractive long-term opportunity within the rapidly evolving AI landscape.

More broadly, demand for foundation model developers continues to be supported by growing enterprise adoption of AI technologies, significant investment in AI infrastructure and increasing integration of AI tools across industries. The manager believes that leading participants in this segment remain well positioned to benefit from these structural trends.

Private market investments in this area may also offer potential pathways to value realisation through future strategic transactions, secondary market activity or public listings, although the timing and outcome of such events remain uncertain.

Diversified AI Ecosystem Exposure

Other AIX exposures include:

- Autonomous systems and robotics;
- AI-enabled defence and security technologies;
- AI-native software and productivity platforms;
- Enterprise AI applications; and
- AI infrastructure and supporting technologies.

These new investments, combined with the existing portfolio, bring AIX's committed amount to 58.5% of the Trust and provide exposure across multiple layers of the AI ecosystem, reducing reliance on any single company or technology.

The Pengana Capital team.

Pengana Investment Management Limited ACN 063 081 612, AFSL 219462 (Pengana) is the issuer of this information and units in AI Private Opportunities Trust ARSN 697 001 184 (AIX).

This information is of a general nature only and has been prepared without taking into account your objectives, financial situation or needs. Before making an investment decision in respect of AIX you should consider the TMD available at pengana.com/AIX and assess whether AIX is appropriate given your objectives, financial situation and needs.

Neither Pengana nor any of its related entities, directors, partners or officers guarantees the performance of, or the repayment of capital, or income invested in AIX. An investment in AIX is subject to investment risk including a possible loss of income and principal invested. Past performance is not a reliable indicator of future performance, the value of investments can go up and down.

There are no guarantees that an active trading market with sufficient liquidity will develop or that such a secondary market will sustain a price representative of the NAV per AIX unit. In circumstances where AIX units are suspended from the ASX, unitholders may not be able to sell their AIX units via the ASX until trading recommences.
