What this Rating means

The 'Recommended' rating indicates that Lonsec has strong conviction the financial product can generate risk adjusted returns in line with relevant objectives. The financial product is considered an appropriate entry point to this asset class or strategy.

Strengths

- Leah Zell, Founder of the firm, is synonymous with international small cap investing.
- The Manager has a well-developed investment philosophy, which is well-entrenched among senior members of the team.
- The Fund provides investors with a truly idiosyncratic investment exposure to global small caps in a high conviction manner.

Weaknesses

- High key person risk in Zell with regard to business sustainability and leadership, albeit has reduced since Pengana's acquisition of the business.
- Senior members of the team have limited experienced support, including the recent departure of a Senior Analyst.
- The Fund is the most expensive product in the peer group.

Fund Risk Characteristics

What is this Fund?

- The Pengana Global Small Companies Fund (the 'Fund') is an actively managed, long only global equities product that focuses on small and mid-cap companies, targeting a median portfolio market capitalisation of less than US\$3bn. The strategy is value-oriented and seeks quality businesses that can create significant value at compelling prices by applying bottom-up, fundamental analysis. The Fund aims to outperform the MSCI AC World SMID Cap Index AUD by 3% p.a. (after fees) over rolling three-year periods.
- Pengana Capital Limited ('Pengana'), as Responsible Entity, has appointed Lizard Investors LLC ('Lizard' or the 'Manager') as the underlying investment manager of the Fund.
- The Manager seeks to invest in companies identified as having distinct competitive advantages within their respective sectors. Furthermore, the Manager aims to invest when these companies are considered a value opportunity due to limited available research, corporate actions, unfavourable investor perception or other circumstances.
- The portfolio is constructed with no regard to a benchmark and considered concentrated holding between 30-80 stocks. Stocks are typically held for the longer term and portfolio turnover is expected to be 20-50% p.a. The Fund's returns are likely to vary significantly from the benchmark. Cash may be up to 20% of the portfolio and should typically be around 5% as a residual of the bottom-up stock selection process.
- The Fund may have exposure to derivatives where the Manager seeks to opportunistically hedge currency or to more efficiently gain economic exposure. Derivatives are expected to be used sparingly.
- As per the PDS dated 1 December 2020, the fee disclosure for the Fund is as follows – management cost of 1.334% p.a. and estimated performance fee of 0.07% p.a. The performance fee is charged at 20.5% of any return greater than the index after management fee. Lonsec notes that in accordance with the Manager's interpretation of RG97, the performance fee has been disclosed for illustrative purposes only and the PDS acknowledges that the actual performance fee may be above or below this level.
- For the financial year ended 30 June 2020, the net transaction costs for the Fund were estimated at 0.306% of the NAV of the Fund. Net transaction costs

are costs incurred in managing the Fund (including explicit and implicit costs of buying and selling assets, the cost of hedging/protection strategies and/or when there are applications or redemptions of fund units by investors) that are not covered by the buy/sell spread. Buy/sell spreads are subject to change depending on market conditions. Refer to the Manager for current buy/sell spreads.

Using this Fund

This is General Advice only and should be read in conjunction with the Disclaimer, Disclosure and Warning on the final page.

- The Fund primarily provides investors with exposure to global equity small caps and accordingly, may experience both positive and negative and at times, sharp movements in the value of capital invested. Lonsec believes small cap products should be used to complement, rather than replace, large cap exposures. Lonsec recommends a minimum investment timeframe of five to seven years. The Fund should be used within the growth component of a diversified portfolio.
- Investors should be mindful of the relative risk of small caps and limit allocation to the sector accordingly. Notably, small caps, due to their nature, can be less liquid and more volatile than large caps.
- The Fund's value investment style will typically invest in stocks that are cheaper than the broader market (e.g. as measured by a lower relative price/earnings ratio). Furthermore, a value investment style is expected to deliver their strongest relative performance during down markets (i.e. protect on the downside).

Suggested Lonsec risk profile suitability

Changes Since Previous Lonsec Review

- Senior Analyst Kevin McQuarrie departed the firm in February 2021 after two years with the Manager. McQuarrie had a particular focus on US companies and the North America region.
- Lonsec has not been advised of any changes to the investment process since the previous review.

Lonsec Opinion of this Fund

People and resources

- Lizard was founded in 2008 by Leah Zell, one of the pioneers in international (i.e. global ex-US) small cap investing. Zell has an extensive career spanning more than 41 years, including 10 years managing the Acorn International Fund. Zell also has a track record of building successful investment businesses. As Founder and Chairperson, Zell oversees the general direction of the firm. Lonsec believes Zell is well-qualified to lead the team.
- The Fund is managed by CIO and Portfolio Manager Jonathon Moog, with support from Head of Research

ANALYST: HONG HON | APPROVED BY: JAMES KIRK

Pengana Global Small Companies Fund

ISSUE DATE 08-04-2021

and Portfolio Manager David Li. Moog is responsible for portfolio construction decisions, and Moog and Li are the drivers of idea generation at the firm. Moog is viewed by Lonsec as the guardian of the investment process – setting the agenda for the weekly investment meetings and managing the analyst team.

- Lonsec considers Moog and Li to be experienced investment professionals, having partnered with Zell at Lizard since 2008. Moog has 20 years of investment experience across several firms and specialised in US companies across industries, including business services, restaurants, retail, media and industrials. Similarly, Li has 17 years of investment experience and was previously an Analyst at a Long/Short Equities manager primarily responsible for US companies. Li's coverage also spanned China, Korea and Taiwan.
- The team operates as generalists, although Lonsec notes complementary investment backgrounds among the individual team members. For instance, while Zell has covered small caps globally, she made her name managing international strategies and prior to the launch of the Fund, the team was primarily focused on international small companies. On the other hand, Li and Moog bring greater prior experience in US equities, and industry-specific knowledge. The blend of experience is regarded as important for this broad-based global strategy. Lonsec notes that Zell has no formal stock coverage. This leaves Moog, Li and the Research Analysts responsible for primary research. Lonsec views positively the over ten-year working relationship of the three senior members.
- While the Manager has made efforts to expand the analyst team, this remains an ongoing process following the departure of Senior Analyst Kevin McQuarrie in February 2021, who had been with the Manager for two years. The team's experience has reverted to be heavily skewed to Zell, Moog and Li. Workload is also said to be concentrated with Moog and Li, with support from the Research Analysts Tam Phan and Michael Ryan, who both continue to develop their skillset and knowledge of the investment process. Lonsec notes that the Manager has historically been hesitant to hire senior members due to possible philosophical misalignment brought from previous firms, while also being particularly cautious of cultural alignment. That said, Lonsec highlights that Ryan now has seven years tenure at the firm and can be considered experienced. The Manager's recruitment intentions and, more generally, the analytical support for the senior members will be a focus of future reviews.
- The team is centrally located in Chicago, which Lonsec considers positive for the firm's culture and communication. The Manager has also highlighted the benefits of the location for company meetings, with a significant number of small-cap companies travelling through the city each week. Pleasingly, the Manager has noted good access to companies despite their moderate levels of FUM.
- Lonsec considers key person risk to be significant with the senior members given the small size of the team and individual's regional and industry skills. Zell is the Founder and original owner of the

firm and, pleasingly under the revised ownership structure, has retained 33% equity ownership in the firm. Moog and Li have alignment through the profit sharing arrangement, which provides reasonable ties to the business and should help to mitigate the risk of departures. Lonsec notes, however, that the arrangement is a weakening from their prior equity ownership in the firm.

- Remuneration comprises a base salary and discretionary bonus that is tied to the performance of the Fund and business. Lonsec considers the alignment of interests between senior members and end investors to be good but scope for improvement including co-investment. Nonetheless, Lonsec considers that Lizard's business would be vulnerable if Zell were to depart for any reason, given she is synonymous with the firm. If Zell were no longer involved, Lonsec will likely reconsider the Fund's rating.
- It remains early to assess the impact of Pengana's acquisition on Lizard, which occurred in January 2020. To date, the two firms have demonstrated a good business relationship. Furthermore, Pengana has a successful track record of creating long term partnerships with investment teams and also committed to providing Lizard with working capital to grow the firm. Lonsec will continue to monitor for any impact in future reviews.

Research and portfolio construction

- Lonsec believes the Manager has a robust philosophy that revolves around identifying high-quality businesses, where the team believes it has a clear understanding of the source of their competitive advantage and investing in these businesses when they are out-of-favour or overlooked. Overall, Lonsec views the Manager's philosophy positively and believes it is well-entrenched among senior members of the team.
- Lonsec is mindful that the Manager was founded as a non-US only investor and, notably, with a flexible long/short approach. The global strategy underpinning this Fund was initially incubated internally (since terminated) and outside of this Pengana product, the Manager has no further plans to distribute the capability. Nonetheless, Lonsec notes the Fund has garnered a healthy level of assets since its launch, which has helped cement the capability. The Manager maintains that it is not an asset gatherer and is seeking to benefit its clients by capping its funds under management at appropriate levels, which Lonsec views positively.
- The Manager has highlighted only a single process is applied at the firm. Lonsec has noted that the investment process to date has resulted in a high degree of commonality between the two strategies with the global strategy maintaining a moderate exposure to North America (24.8% in January 2021), which has remained relatively constant over time. This has been beneficial in the context of the team's resourcing and workflow particularly. There is a risk that should US companies become more attractive, this could compromise the current arrangements, particularly given the recent departure of McQuarrie. While noting recent improvements in the performance of the Fund's North America

ANALYST: HONG HON | APPROVED BY: JAMES KIRK

P. 3-9

Pengana Global Small Companies Fund

ISSUE DATE 08-04-2021

exposure, Lonsec believes some uncertainty remain around the Manager's commitment to the US region.

- The Fund has a flexible mandate and is permitted to invest in some mid-cap stocks. The Manager aims for a median portfolio market capitalisation of less than US\$3bn. Lonsec highlight that this is different to most peers with market cap limits on individual stocks, and are only allowed to hold mid-cap stocks via price appreciation and will typically sell at US \$10-15bn. By way of example, Lonsec has previously observed that the Manager purchased CTrip.com International Ltd. in July 2018, which at the time had a market cap of approximately US\$23bn. The Manager reasoned the purchase due to valuation support, believing the market had misunderstood the power of the business model, and having gained this perspective through their industry knowledge from other portfolio holdings. While Lonsec views this to be outside the realm of the Fund's small cap mandate, Lonsec is sympathetic to the logic and acknowledges the median portfolio market capitalisation has remained below US\$3bn through time. That said and noting the time since the above example, Lonsec considers the purchase to be inconsistent with the small cap exposure many investors are seeking, and will continue to monitor the Manager's market cap discipline in future reviews.
- Lonsec considers the Manager's research and due diligence on companies to be disciplined and sufficiently detailed. The Manager's long term focus allows the team to be patient with investment ideas. Lonsec also believes the Manager is pragmatic about the number of opportunities it covers. The firm has strict investment criteria that an opportunity must meet relating to its business model, balance sheet, management, corporate governance and valuation before it is a potential buy. Lonsec is mindful that having a long holding period may lead to a soft sell discipline by providing companies further opportunities to perform following an earnings downgrade. Lonsec is of the view that a strong sell discipline is an important driver of outperformance.
- Ongoing research discussions ensure the team's research efforts are focused on appropriate investment ideas. At any point in time, the team is conducting due diligence on an active pipeline of 15 companies and actively maintaining a watchlist of around 300-400 stocks. The senior members of Moog and Li determine which companies are selected for further research. Internally-derived research consumes a significant part of the team's efforts, with external experts used at times to gain further insight into different industries or regions. Given the small team, the Manager seeks to use its time efficiently and focus on where value can be added, which Lonsec views positively.
- A quantitative model, including scenario modelling of base and bear cases, and qualitative review of a company forms the basis for the team's formal recommendation. The Manager has a devil's advocate element to the process in an effort to challenge the investment thesis of new and existing stocks. Lonsec views this element positively, particularly given the Manager's longer holding period than many small cap peers. Lonsec also considers this element of the

process to promote greater scrutiny, while creating greater ownership of the portfolio among the team.

- Lonsec notes that portfolio construction is the responsibility of Moog who monitors top-down risks and macroeconomic issues, which he discusses with other team members, while Li focuses on idea generation. The Fund is typically managed in a concentrated fashion, that Lonsec considers to be consistent with the Manager's high conviction investment approach. Lonsec views the level of conviction within the Fund positively and as a key point of difference from many peers. Lonsec also views favourably the Fund having a single point of accountability in Moog.
- A stock is sold if it reaches its target valuation or the investment thesis becomes invalidated. Lonsec has, however, observed that the Manager has, at times, held onto companies and noted that fair value is less important, particularly for companies with pricing power or monopolistic qualities. Lonsec notes that the Manager's flexible approach to valuation has been a key contributor to the Manager's poor stock selection, as was the case during 2018. Since then, the Manager has implemented the devil's advocate element and ongoing efforts to challenge the investment thesis of longer term stock holdings. Pleasingly, Lonsec has observed early signs of improvements in the Manager's sell discipline. Lonsec will continue to test this aspect in future reviews.

ESG integration

- The Manager has indicated a commitment to ESG. There was, however, no evidence in their public positioning. Furthermore, there was a limited policy framework to support the ESG approach, and the Manager does not provide any details on their proxy voting policy or voting outcomes, or engagement policy or engagement outcomes. This contrasts with industry norms.
- There is little evidence of ESG integration within the research elements of the investment process when benchmarked to industry peers. No ESG integration was visible in valuation process, and there was no overall approach to ESG portfolio risk being implemented. Overall, Lonsec considers the level of ESG integration within the Fund to be low to moderate on a peer relative basis.

Risk management

- The Fund is constructed with no regard to the benchmark and has only broad absolute limits. Tracking error is not targeted and risk is predominantly managed in an absolute sense during the bottom-up stock analysis. As the Fund is concentrated, each position has clear drivers and risks. Ultimately, the Manager seeks to construct a portfolio that comprises 30-80 idiosyncratic investment ideas. Furthermore, top-down risks, including industry, regional and currency risks, are assessed as they affect each individual stock.
- The Manager is not reliant on quantitative systems to monitor the biases or risks in the overall portfolio. The implementation of the investment management and portfolio administration system Integrata has, however, allowed for greater risk monitoring and analysis. Lonsec considers risk management

ANALYST: HONG HON | APPROVED BY: JAMES KIRK

Pengana Global Small Companies Fund

constraints to be appropriate given the philosophy of the Fund. Furthermore, the Manager monitors the liquidity profile of the portfolio, which Lonsec considers important for small cap portfolios.

- Additionally, Pengana's risk management team led by CIO Nick Griffiths, prepares a monthly risk report for the Fund. This includes risk contributions, liquidity risk analysis, style exposure analysis, stress testing and trading activity. Pengana discusses the risk report with Moog at least on a bi-monthly basis. Lonsec is pleased risk reporting is conducted separate to the investment team.

Capacity management

- The strategy's FUM has stabilised at \$139m (as at 28 February 2021) over the past year after experiencing a significant decline in the preceding 12-month period. The Manager has estimated capacity for the strategy of US\$500m. Lonsec believes the strategy has significant room to grow before capacity becomes a limiting factor to performance for this relatively low turnover strategy. At present, Lonsec does not have any capacity concerns.

Performance

Investors should note that the Fund uses the MSCI AC World SMID Cap Index AUD as its benchmark, while the following commentary and Quantitative Performance Analysis at the back of this report refer to the MSCI World Small Cap NR Index AUD.

- The Fund has not met its investment objective based on the MSCI World Small Cap NR Index AUD (the 'Benchmark'). Over the three years to 28 February 2021, the Fund returned 7.6% p.a. (after fees), underperforming the Benchmark by 3.4% p.a. Over the year to 28 February 2021, the Fund's return was 16% to underperform the Benchmark by 1.2% (after fees). Pleasingly, the Fund's three-year relative return is stronger than the peer median return and achieved by taking much higher active risk (as measured by tracking error) of 7.5% p.a. relative to the peer median.
- The Fund's performance based on its own benchmark has also been disappointing. Over the three years to 28 February 2021, the Fund underperformed its own benchmark by 2.1% p.a. (after fees), but outperformed by 2.5% (after fees) over the year to 28 February 2021.
- Lonsec notes the Fund's disappointing relative performance over the three-year to 28 February 2021 was impacted by the Manager's value investment style – a period which favoured growth investing. Additionally, performance was impacted by the Fund's underweight to the stronger performing US market due to a lack of appropriate value opportunities.

Overall

- Lonsec has maintained the Fund's 'Recommended' rating at the most recent review. Lonsec believes the Manager exhibits a well-developed investment philosophy that is supported by experienced senior team members dedicated to managing global small caps. The Manager's efforts to address sell discipline concerns via process and workflow enhancements have been encouraging, which Lonsec believes has contributed to recent improvements in absolute and relative performance.
- Lonsec is mindful of the limited experienced support for senior team members following a recent departure and some uncertainty in the Manager's commitment to the US, which is a significant region for small cap investing. The Manager's analytical support for senior team members and, more generally, recruitment intentions will be a focus of future reviews.

People and Resources

Corporate overview

Pengana Capital Limited, as Responsible Entity, has appointed Lizard Investors LLC ('Lizard') as the underlying investment manager of the Fund.

Lizard is an investment manager specialising in value-oriented international small and mid-cap companies. The firm was founded by Leah Zell in 2008 and is headquartered in Chicago, USA. As at 28 February 2021, Lizard had A\$602m in FUM.

Pengana is an Australian diversified funds management group. Founded in 2003 and headquartered in Sydney, Pengana manages over \$3.6bn (as at 28 February 2021) across a range of Australian and International strategies. Pengana is owned by its directors and staff, with Washington H. Soul Pattinson and Co Limited holding a minority stake.

Pengana has a 67% equity ownership in Lizard, with Zell owning the remaining 33% equity.

Size and experience

NAME	POSITION	EXPERIENCE INDUSTRY / FIRM
LEAH ZELL	FOUNDER / CHAIRPERSON	41 / 11
JONATHAN MOOG	CIO / PORTFOLIO MANAGER	20 / 11
DAVID LI	HEAD OF RESEARCH / PORTFOLIO MANAGER	18 / 11
MICHAEL RYAN	RESEARCH ANALYST	7 / 5
TAM PHAN	RESEARCH ANALYST	10 / 3

The team comprises five investment professionals, with two Portfolio Managers (including one as Head of Research) and two Research Analysts.

The firm is led by Founder and Chairperson Leah Zell. Zell has significant experience investing in small and mid-cap companies with a speciality for international stocks. Prior to establishing Lizard in 2008, Zell built her reputation at Wanger Asset Management between 1992-2005, where she served as Head of the International Equities Team, Lead Portfolio Manager of the Acorn International Fund and Portfolio Manager of the Wanger

Pengana Global Small Companies Fund

ISSUE DATE 08-04-2021

European Smaller Companies Fund. Zell was a Global Equity Analyst at Harris Associates between 1984-1992, and began her career at Lehman Brothers in 1979.

The Fund is managed by CIO and Portfolio Manager Jonathan Moog. Moog joined in 2008 shortly after Lizard was founded. Moog has 20 years of investment experience across several firms including as Senior Research Analyst at Brightpoint Capital, Private Equity Consultant at Investor Group Services, and Equity Research Associate at Loomis Sayles. Moog's experience has been predominantly related to research on US companies, specifically within the business services, restaurants, retail, media and industrials sectors.

Head of Research and Portfolio Manager David Li joined when Lizard was founded. Zell met Li in 2008 when he was working at Amici Capital, a Long/Short Equities manager. Li has 17 years of investment experience primarily researching US companies, as well as those based in China, Korea and Taiwan. Li previously specialised in the technology, media and telecommunications (TMT), industrials, and business services sectors.

Team structure

The team are considered generalists by coverage. At the senior level, the team has some industry and geographical expertise, and coverage is split by areas of competency. Research Analysts supports the senior members and assist with data work, including analysing financial statements and some modelling.

The Portfolio Managers and Research Analysts are responsible for primary research including company meetings, while Zell does not have any specific stock responsibilities.

Remuneration

The team receive a salary and bonus that is closely tied to the performance of the Fund.

Moog and Li, as senior members of the team share 50.1% of the profits derived from the global small-caps strategies managed.

Research Approach

Overview

RESEARCH PHILOSOPHY	FUNDAMENTAL, BOTTOM-UP
TARGET COMPANY	QUALITY BUSINESSES THAT ARE MISPRICED, OVERLOOKED AND OUT-OF-FAVOUR
MINIMUM MARKET CAPITALISATION	NO MINIMUM – TARGET MEDIAN PORTFOLIO MARKET CAP OF LESS THAN US\$3BN
NUMBER OF STOCKS IN MANAGER'S UNIVERSE	50,000
NUMBER OF STOCKS FULLY MODELLED/RESEARCHED	100 – 125
RESEARCH INPUTS	COMPANY REPORTS AND STATEMENTS; MEETINGS WITH MANAGEMENT, CUSTOMERS, SUPPLIERS, COMPETITORS AND INDUSTRY EXPERTS
BROKER RESEARCH	MINOR CONSIDERATION
VALUATION OVERVIEW	FREE CASH FLOW MULTIPLE, PRICE/EARNINGS, EV/EBIT, EV/EBITDA

Universe filtering

The investment universe of small and mid-cap companies comprises around 50,000 stocks. The universe is initially filtered using five criteria – sustainable business model, strong balance sheet, disciplined management, strong corporate governance and compelling valuation. The filtered universe is

compiled by the three senior members in a qualitative manner using the criteria, which forms a watchlist of around 300-400 stocks that the team considers warrant further research.

Additionally, investment ideas may come from price dislocations created by short term or misunderstood situations. This process is led by Li, however, any member of the team can contribute to idea generation. Potential opportunities are directed by senior members based on experience and resourcing.

Research process

The majority of the team's effort is devoted to company research. Research includes analysing financial statements (balance sheets and cash flow) and meeting with management, as well as customers, suppliers, competitors and industry experts. The team assesses a company's investment thesis, downside protection, track record of management, business ownership, and its key drivers and risks. External sources are used at times such as industry or regional-specific consultants. The Manager may also consider sell-side research for contrarian signals. The team spends around 25% of their time travelling, which is organised around specific company meetings. Notably, many meetings are also conducted in the US as companies travel through the Manager's Chicago office.

Valuation

The Manager's valuation approach is based on a company's long term cash flow generation, and must have the potential to generate 20% annualised returns over a three to five-year timeframe. Valuation is predominately based on a company's free cash flow, however, other metrics such as price/earnings and EBITDA are also considered. Standardised models are used and presented to the team, including historical and future performance under multiple scenarios.

Portfolio Construction

Overview

FUND BENCHMARK	MSCI AC WORLD SMID CAP INDEX AUD
EMERGING MARKETS PERMITTED	YES
INTERNAL RETURN OBJECTIVE	TO OUTPERFORM THE BENCHMARK BY 3% P.A. (AFTER FEES) OVER ROLLING THREE-YEAR PERIODS
INTERNAL RISK OBJECTIVE	TO AVOID CAPITAL DRAWDOWNS
PORTFOLIO MANAGEMENT APPROACH	BENCHMARK AGNOSTIC
INVESTMENT STYLE	VALUE / QUALITY
PORTFOLIO DECISION MAKING	CO-PORTFOLIO MANAGERS (UNANIMOUS CONSENT NOT REQUIRED)
STOCK SELECTION	BOTTOM-UP
TOP-DOWN INFLUENCE	MINOR CONSIDERATION
MARKET CAPITALISATION BIAS	SMALL – MID
TYPICAL NUMBER OF HOLDINGS	30 – 80
EXPECTED PORTFOLIO TURNOVER	20 – 50% P.A.
OBSERVED ACTIVE SHARE	94.6% (FEBRUARY 2021)
PORTFOLIO EXPOSURE IN TOP 10 HOLDINGS	30.2% (FEBRUARY 2021)

Decision making

Moog has ultimate responsibility for decision making for the final portfolio. The Fund is constructed in a concentrated, high conviction manner, with position

ANALYST: HONG HON | APPROVED BY: JAMES KIRK

Pengana Global Small Companies Fund

ISSUE DATE 08-04-2021

sizes ranging between 1.5-5% and a maximum stock weight of 10%. Position sizes are based on the team's conviction in the stock, its perceived risk and liquidity.

Buy and sell drivers

A stock is a buy candidate if it meets the Manager's stock selection criteria and its valuation is perceived to be compelling.

A stock will be sold if it reaches its target valuation or the investment thesis becomes invalidated. Where a company continues to exhibit price control or monopolistic qualities, and the team believes it can continue to compound in value, fair value is less important and the Manager may continue holding the stock.

Risk Management

Risk limits

SEPARATE INVESTMENT RISK MONITORING	YES
STOCK LIMITS	MAXIMUM 10%
SECTOR / INDUSTRY LIMITS	MAXIMUM 35%
COUNTRY / REGION LIMITS	MAXIMUM 55% (US) / 25% (COUNTRIES EX-US)
CASH LIMIT	MAXIMUM 20%

The Fund is managed in a benchmark agnostic manner. Broad absolute limits apply on individual stocks, sector and country exposures, and cash holdings.

Risk monitoring

The Manager's investment management and portfolio administration system Integrata allows for real-time risk factor analysis and reporting. The system also allows for stress testing and scenario analysis, and provides profit and loss monitoring of the portfolio.

Separately, investment risk monitoring is conducted by Pengana, which is managed after the fact and not a pre-trade check.

Currency management

The Manager has the ability to use exchange-traded derivatives to opportunistically hedge the portfolio's currency exposure. However, the Manager has advised currency hedging will be used sparingly.

Risks

An investment in the Fund carries a number of standard investment risks associated with domestic and international investment markets. These include economic, political, legal, tax and regulatory risks. These and other risks are outlined in the PDS and should be read in full and understood by investors. Lonsec considers major risks to be:

Currency risk

The Fund invests predominantly in assets that are denominated in non-AUD currencies. A rise in the relative value of the AUD with respect to the currencies in which the assets are denominated will negatively impact the market value of the assets (and vice versa) from an Australian investor's perspective.

Market risk

Companies with a smaller market capitalisation generally have greater market risk (i.e. beta).

Accordingly, investors should be mindful of the potential for sharper movements in market price of these investments.

Liquidity risk

In some cases, global equities may present low liquidity in particular regions relative to deep markets such as the U.S. Small caps may display low liquidity due to lower volume and fewer market participants relative to large caps.

Pengana Global Small Companies Fund

Glossary

Total return ‘Top line’ actual return, after fees
Excess return Return in excess of the benchmark return
Standard deviation Volatility of monthly Absolute Returns
Tracking error Volatility of monthly Excess Returns against the benchmark (the Standard Deviation of monthly Excess Returns)
Sharpe ratio Absolute reward for absolute risk taken (outperformance of the risk free return (Bank Bills) / Standard Deviation)
Information ratio Relative reward for relative risk taken (Excess Returns / Tracking Error)
Worst drawdown The worst cumulative loss (‘peak to trough’) experienced over the period assessed
Time to recovery The number of months taken to recover the Worst Drawdown
Snail Trail A trailing 12-month relative performance and relative risk measurement over the benchmark. The trail is generated using a 12-month rolling window over the specified period

About Lonsec

Lonsec Research Pty Ltd (Lonsec) is an investment research house with specialist areas of expertise, that was originally established in 1994 and the current entity was registered on 23 June 2011. From 1 July 2011, Lonsec became a fully owned subsidiary of Lonsec Fiscal Holdings Pty Ltd, a privately owned entity with a multi-brand strategy of providing leading financial services research and investment execution. Lonsec believes that professional financial advisers need informed opinions on the best investment strategies and financial products to provide real value for their clients. To meet this need, Lonsec has in place an experienced research team, which draws on a robust research process to undertake in-depth assessment of managed fund products.

Analyst Disclosure and Certification

Analyst remuneration is not linked to the research or rating outcome. Where financial products are mentioned, the Analyst(s) may hold the financial product(s) referred to in this document, but Lonsec considers such holdings not to be sufficiently material to compromise the rating or advice. Analyst holdings may change during the life of this document. The Analyst(s) certify that the views expressed in this document accurately reflect their personal, professional opinion about the matters and financial product(s) to which this document refers.

LONSEC STRONGLY RECOMMENDS THIS DOCUMENT BE READ IN CONJUNCTION WITH THE RELEVANT PRODUCT DISCLOSURE STATEMENT. IMPORTANT NOTICE: Issued by Lonsec Research Pty Ltd ABN 11 151 658 561 AFSL 421 445 (Lonsec). Lonsec receives a fee from the fund manager or financial product issuer(s) for researching the financial product(s), using objective criteria and for services including research subscriptions. Lonsec’s fee is not linked to the rating(s) outcome. Lonsec Investment Solutions Pty Ltd ABN 95 608 837 583 CAR (CAR: 001236821) of Lonsec receives fees under separate arrangement for providing investment consulting advice to clients, which includes model portfolios, approved product lists and other financial advice and may receive fees from this fund manager or financial product issuer for providing investment consulting services. Refer to the Conflicts of Interest Statement at: Lonsec.com.au/important-documents Lonsec does not hold the financial product(s) referred to in this document. Lonsec’s representatives and/or their associates may hold the financial product(s) referred to in this document, but details of these holdings are not known to the Analyst(s). **Warnings:** In line with industry practice returns may be estimated, to access verified returns please refer to the product provider. Past performance is not a reliable indicator of future performance. Any advice is General Advice based on the investment merits of the financial product(s) alone, without considering the investment objectives, financial situation and particular needs of any particular person. It is not a recommendation to purchase, redeem or sell the relevant financial product(s). Before making an investment decision the reader must consider his or her financial circumstances or seek personal financial advice on its appropriateness. Read the Product Disclosure Statement for each financial product before making any decision about whether to acquire a financial product. Lonsec’s research process relies upon the participation of the fund manager or financial product issuer(s). Should the fund manager or financial product issuer(s) no longer participate in Lonsec’s research process, Lonsec reserves the right to withdraw the document at any time and discontinue future coverage. The product rated in this publication may have related financial products or be associated with other financial products and platforms. The rating may only be applied to the financial product outlined in this publication at first instance, seek professional advice before you make an investment decision on related or associated financial products and platforms. You should be aware that the mandate, fees, underlying investments, the issuers of the related and associated financial products and platforms may be different from the financial product specified in this publication. **Disclaimer:** This document is for the exclusive use of the person to whom it is provided by Lonsec and must not be used or relied upon by any other person.
